

Mohammad Mustakim Hassan

Full-stack Developer

I am a final year (Graduation 2022 Dec) student working as a full stack software developer. I have been developing professionally for half a year and have longer experience working with front end technologies as a freelancer. Although I have found my strongest skills are in backend development and it is there I do my best. I can help everywhere in the stack and I love wearing multiple hats to an extent.

EXPERIENCE

Team Contact, Remote — Full Stack Developer

NOV 2020 - PRESENT

Following waterfall, agile software development life cycle model and methodologies, I have worked with a team to deliver our clients clients -

- Monolithic single vendor ecommerce.
- Inventory software for chain medical pharma stores.
- Website for a restaurant with order and catering service.
- Enterprise Resource Planning Web Application.

Elephant Communication, Dhaka — Web Developer

JUN 2021 - DEC 2021

Elephant Communication is a creative tech agency based in Dhaka, Bangladesh. At elephant we offer creative & tech solutions to your brand and business through our strategic and effective approach.

My responsibility at elephant was to -

- Provide Tech Solution for clients
- Developing CMS/ Monolithic solution as required

Contact, Remote — Freelancer

2017 - 2019

I started out at online websites with PSD to HTML conversion, content writing & managing social media. I quickly moved on to developing websites with WordPress, wix. Within a short time I found myself writing scripts in different languages to automate random small things clients wanted - google sheets, excel macros, JavaScript rss feed watcher etc. I have also made logos for offline clients on request. My most memorable project was a short animated educational advertisement video I made with Adobe Illustrator and PowerPoint.
